Student Services Announcements

[CSCS Student Services Google Site:](#)

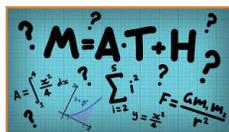

- ❖ Make an appointment with Sarah or Kim
- ❖ Mental health support
- ❖ Community resources

Stress and Coping Group:

Sarah will be running a virtual group for students who would like to meet once a week to talk about stress you are experiencing during this pandemic and how to cope with it. Please fill out this form if you are interested in participating. Once a day and time is established and a parent/guardian has given consent for you to participate, you will receive an invitation to the group. **Fill out this [google form](#) by Tuesday, April 21st if you are interested.**

Social Justice/ Equity Club

Jada, Tyler and Sarah would like to invite you to join the social justice/equity group virtually for the remainder of this year. We plan on meeting once per week. **Please fill out this [google form](#) by Tuesday, April 21st** if you are interested in participating and we will send you an invite to the group meetings once we've established a day and time.

Math Workshop Updates

We have enjoyed seeing all the students who have joined us for an [Open Math Hour](#). We are requesting that all students check-in at least one time per week on the Open Math Hour. Next week, we will have new hours available, but the link is always available in Buzz.

Have you logged into your Math Workshop yet? We will be sending out emails to check-in with students and their progress in math workshop. Please let us know if you have any questions!

Math Models Update: Students will only be required to submit ONE math model this year. If you have not completed a math model this year OR you are needing to make-up a previous year's math model, we will be opening a section with math model options for any level or type. Please contact your advisor OR attend an Open Math Hour to sign-up for this opportunity. Math models will start Monday, April 20 to be wrapped up by Thursday, May 21.

Sending health and wellness to all of you!
Monica, Tyler S, Mary, Beth, and Mary Lee
The Math Workshop Team

Earth Day

Hey fellow Earthlings!

The 50th anniversary of Earth Day (**April 25**) is coming up quickly! YEAH! While I had hoped to work with the Ecology Club students to have a celebration together, there are still tons of things you can do to celebrate in your own home, yard, or even neighborhood.

Want to share your passion for making a difference? You don't need fancy lab equipment! You can take a pic, upload it, and be part of some of the largest citizen science projects in the world! Check out these GLOBAL citizen science projects [here](#) at Earth Challenge 2020.

Want to learn more on your own? Register and attend the VIRTUAL conference at our very own UW Nelson Institute [here](#). (Yes, this is the conference I take students to annually and that several of you were going to attend with me! There are always great speakers and excellent content lessons at this conference. Attend as much or as little as you want, it's free!

Maybe your yard or even the common spaces in your neighborhood could use a little attention? Take a walk and make a plan to recycle, compost, and remove what needs to be moved, that is within your ability. Here's a [link](#) to a photo gallery of invasive species in Wisconsin. Make sure you have permission to make changes to any spaces you "upgrade"!

Even within your pantry and your home there are opportunities for you to think about how your family manages packaging and food waste. Remember the big R's: reduce, recycle, reuse (repurpose), and rot. If you are interested in composting, check out [this information](#) from the Wisconsin Department of Natural Resources.

Whatever you do, be kind to yourself and the Earth! Take care and let me know how you celebrate!

Heather
